Election/Restrictions

Applicant's election of claims 1-5, 10 in the reply filed on 10/24/05 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Specification

The disclosure is objected to under 37 CFR 1.71, as being so incomprehensible as to preclude a reasonable search of the prior art by the examiner. For example, the following items are not understood: the equation on page 4 of the Specification and in claim 5 is not fully readable/discernable.

Applicant is required to submit an amendment which clarifies the disclosure so that the examiner may make a proper comparison of the invention with the prior art.

Applicant should be careful not to introduce any new matter into the disclosure (i.e., matter which is not supported by the disclosure as originally filed).

Correction is required for both claim 5 and in the Specification. In submitting an amendment, Applicant should be clear in describing how the submitted equation relates to the not-fully-readable version in claim 5 and in the Spec. such that it can be verified that no new subject matter is being added. I.e., a reasonable correspondence between what the elements in the said equation should be versus the current version of said equation in claim 5 and in the Spec.

A shortened statutory period for reply to this action is set to expire ONE MONTH or THIRTY DAYS, whichever is longer, from the mailing date of this letter.
